

Plant observation

This is a list of plants you can find on the Hosford campus. We didn't see a tomato plant, but you would find them all over the neighborhood in the summer.

Plant	Adaptation	Advantage
Rose	thorns	protection
tomato	Chemical signals to warn other plants of predators	protection
fern	Sends out spores	Reproduction
dandelion	Floating seeds	reproduction
magnolia	Flowers - animal help	reproduction
maple	Deciduous - dropping leaves	Saving energy / survival
eucalyptus	Leaves toxin and hard to digest	Protection - koala has evolved to eat it.
conifers	Needle like leaves	Winter protection
daffodils	Perennial bulbs	reproduction
